

Specialising in the Design and Integration of Automatic and Manual Pool Covers

www.designercovers.co.za

Leaders in Pool Covers

Since 2012, Designer Pool Covers has proudly led the South African market in the supply and installation of high-quality automatic and manual pool covers. With over a decade of hands-on experience, we continue to set the standard for pool cover innovation, quality, and service.

As many of our satisfied customers already know – our pool covers are among the safest, most stylish, and easiest to use on the market today.

Whether you're building a new pool or upgrading an existing one, the most important accessory you can invest in is a pool cover.

Our highly qualified team is ready to deliver the ideal solution to suit your needs, lifestyle, and budget.

What we offer

Proven performance and long-lasting reliability

Technical support for clients, architects, and builders

On-site, face to-face customer service

The widest and most exclusive range of pool cover options

Excellent after sales support

Products aligned with international trends and standards

Benefits of Pool Covers

Safety First

As pool owners, and parents we believe every swimming pool must be part of a comprehensive safety plan. South African legislation requires every pool to have a safety feature like a fence, net, or pool cover.

Our pool covers act like a horizontal fence, completely sealing off your pool from unsupervised access by children, pets, or unwanted guests.

Safety Features

-  Withstands up to 150kg (manual) or 250kg per m² (automated)
-  Lockable and tamper-proof systems (varies by product)
-  Durable, long-lasting materials

Always apply multiple layers of safety around your pool. A pool cover is essential, but supervision remains irreplaceable.

Economical & Eco-Friendly

A pool cover isn't just a safety feature, it's a smart investment.

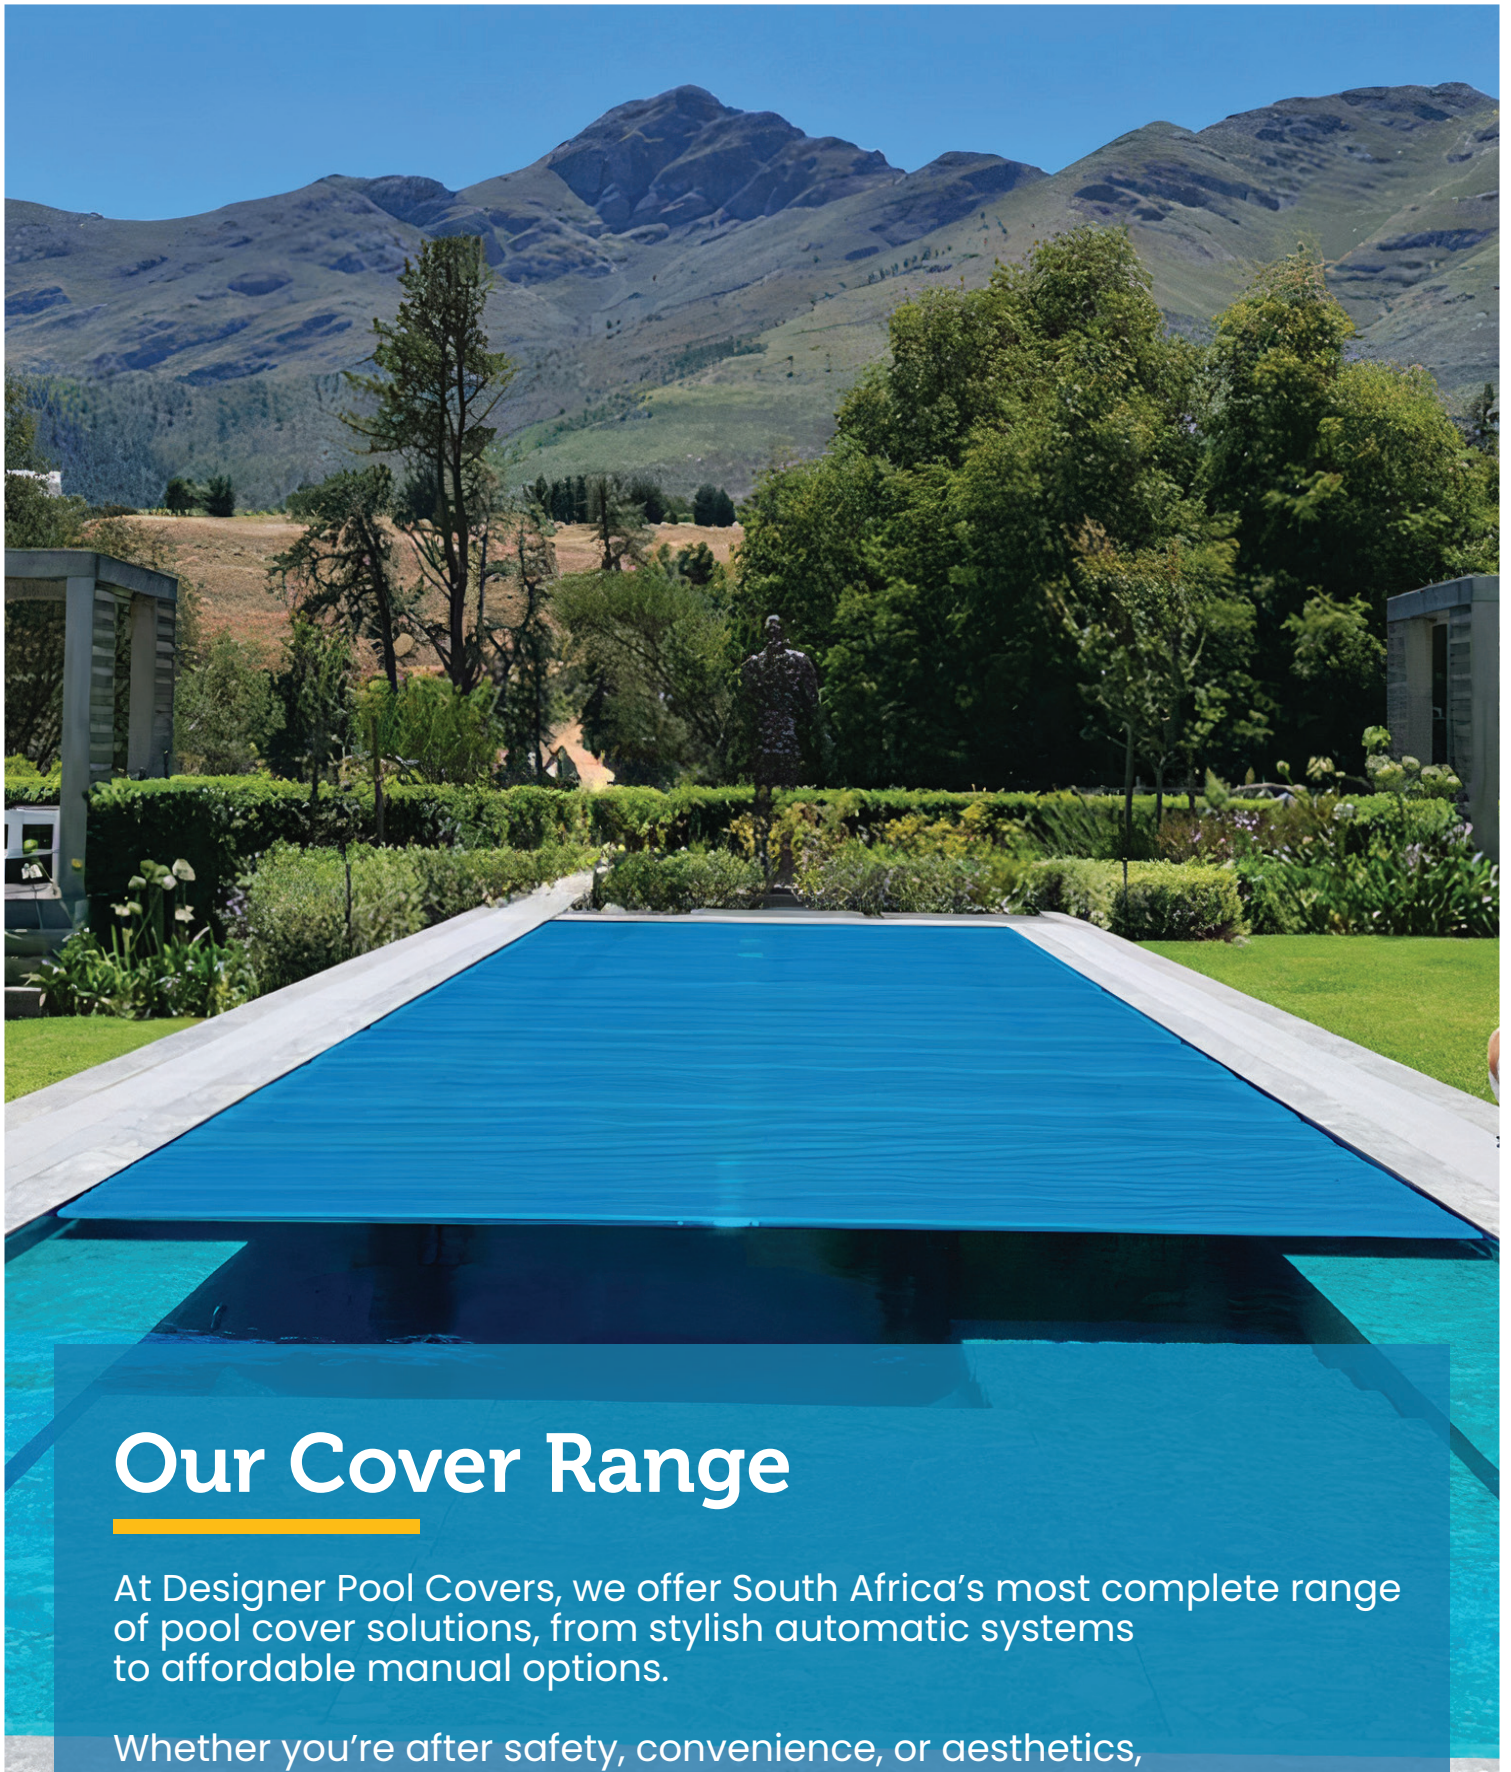

-  **Water**
Up to 80% reduction in evaporation
-  **Heating costs**
Better heat retention
-  **Chemicals**
Chemicals: Up to 70% reduction
-  **Maintenance**
Less cleaning, more swimming

Keeps Your Pool Clean

Relax more, clean less. Our covers keep out dirt, leaves, and debris — and some options even prevent rainwater from entering your pool. Open your Designer Pool Cover and dive into a sparkling, swim-ready pool all year round.

Designed for Any Pool

Whether your pool is new, existing, or uniquely shaped, we'll provide a custom solution. Manual or automatic, above or below ground, we tailor each cover to your space and style, including a range of colours and finishes.

Our Cover Range

At Designer Pool Covers, we offer South Africa's most complete range of pool cover solutions, from stylish automatic systems to affordable manual options.

Whether you're after safety, convenience, or aesthetics, we'll help you find your perfect match.

PoolDeck Slatted Automatic Covers

Looking for a sleek, stylish, and practical way to protect your pool? Our PoolDeck Slatted Automatic Covers are custom made to fit any size or shape pool – whether you have an indoor haven, a backyard retreat, or a large commercial pool.

With a wide selection of polycarbonate or high-quality PVC slats, you'll be able to choose the finish and colour that perfectly complements your space. There are also different installation options available to make sure your cover blends in beautifully with its surroundings.

Using your cover couldn't be easier – simply press a button or turn a key, and the slatted cover gently glides open or closed. It's that simple.

Not only are these covers incredibly elegant and stylish, they're also designed to save you money. With a polycarbonate option, you'll enjoy a natural boost in water temperature – a real win when it comes to cutting heating costs.

Please note:
Slatted covers float on the water. The slats are sealed and buoyant, but for them to double as a safety cover, a safety ledge or stainless steel handrail is required. This ensures there are no gaps between the cover and the pool wall, keeping your loved ones safe.

Installation Options for PoolDeck Covers

We offer two versatile installation methods to suit your space and lifestyle:

Below-Ground Installation

Perfect for new pools, the mechanism is built into a wet pit during pool construction. An optional lid system sits flush with your pool surround, creating a clean, modern look with no obstructions around the pool.

Why you'll love it:

- ✓ Seamless, built-in aesthetic
- ✓ Keeps your pool area sleek and clutter-free

Above-Ground Installation

Ideal for existing pools, the slats can be customised to suit any size pool and retract into a stylish bench of your choice.

Why you'll love it:

- ✓ Quick and easy to install
- ✓ Minimal prep needed
- ✓ Easy to access for cleaning or servicing

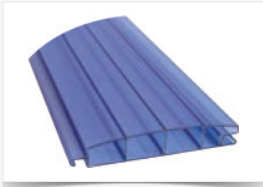

Choose Your Slatted Cover Colour

Your pool cover should complement your space, not compete with it.

That's why our PoolLock Slatted Covers come in a range of stylish colours to suit your pool and outdoor area perfectly.

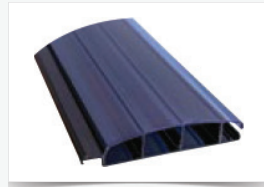

Available Colour Options

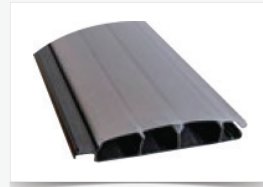

Transparent Blue

A modern, clean look with a touch of shimmer

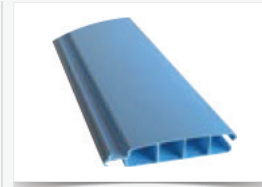

Dark Blue

A modern, clean look with a touch of shimmer

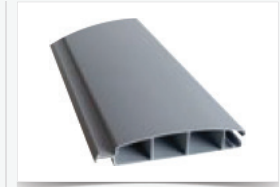

Grey

Contemporary and sleek, great for minimalist spaces

Blue PVC

Durable and vibrant with a timeless pool-blue colour

Grey PVC

Smart and neutral, works beautifully with most surrounds

Additional Installation Options

We offer flexible ways to integrate your cover into the look and feel of your pool, whether it's a brand-new build or an upgrade to your current setup.

Rim Flow Installation

Best suited for new builds, this option allows your cover to be neatly hidden in a wet pit, giving you a clean, streamlined finish.

Also available as an above-ground installation if preferred.

Why choose Rim Flow?

- ✓ Concealed and tidy look
- ✓ Enhances the overall aesthetics of the pool

Martini Bench Seat

This clever solution can be used on both new and existing pools — as long as the pool structure is square. The cover is designed to retract neatly through a discreet gap of approximately 75mm.

A supportive lid system is also included, making it easy to add your finishing tiles.

Why choose the Martini Bench?

- ✓ Elegant and space-efficient
- ✓ Adds a functional bench to your poolside
- ✓ Suitable for retrofits or new pools

PoolLock Hydraulic Vinyl Cover

Effortless safety. Built to last.

If you're looking for the ultimate in pool safety and convenience, the PoolLock Hydraulic Vinyl Cover is it. This fully automatic cover runs on a powerful hydraulic 'direct drive' motor system, which opens and closes the cover with a simple turn of a key.

No electrical parts are installed close to the water – the motor (called the Power Pack) is safely tucked away near your pool pump, keeping your swimming area clear and reducing any risk of electrical hazards.

Whether your pool is small (5m x 3m) or extra-large (up to 25m x 8m), this cover delivers smooth, reliable performance every time.

Why Choose the PoolLock Hydraulic Vinyl Cover?

Ultimate Safety

- ✓ Designed with your family's safety in mind
- ✓ Withstands weight of up to 250kg per m²
- ✓ Perfect for homes, schools, gyms, and commercial spaces

Fast & Convenient

- ✓ Opens and closes in under 60 seconds
- ✓ Turn the key and you're done, it's that simple

No Electricity Near the Water

- ✓ The motor is installed away from the pool to eliminate risk of electrical injuries
- ✓ No chance of water damage to the system

Built to Last

- ✓ A long-term investment with a long operational lifespan
- ✓ Highly durable and versatile

Types of Installation

Choose the setup that suits your space best

When it comes to installing your PoolLock Hydraulic Vinyl Cover, we offer flexible options to fit both new pool builds and renovations.

Each type is designed to blend seamlessly with your pool's surroundings while delivering lasting performance and easy maintenance.

Installation Options for PoolDeck Covers

We offer two versatile installation methods to suit your space and lifestyle:

Under Track – Under Mechanism (Recessed)

Perfect for new builds or full renovations

This installation is ideal for new rectangular pools or those undergoing significant renovations. The track system is cleverly hidden beneath your coping tiles or decking, and the cover mechanism is neatly housed in a concrete pit at the deep end of the pool.

Optional extras include a vanishing lid system to match your finishes – whether it's tiling, decking, or another surface of choice.

Why you'll love it:

- ✓ No visible obstructions around the pool
- ✓ Clean, sleek look that complements modern landscaping
- ✓ Low maintenance and easy to service

Top Track – Under Mechanism

A great option if you're open to a bit of work around your pool

Similar in design to the recessed option, this installation also keeps the mechanism below pool level, safely tucked into a pit. The main difference? The track is installed on top of the pool surface, making this a great fit for those who want a simpler setup without a full pool rebuild.

As with the recessed version, you can opt for a matching vanishing lid to complete the look.

Why you'll love it:

- ✓ Easy to install
- ✓ Discreet mechanism placement
- ✓ Minimal visual impact with maximum convenience

Types of Installation

Smart solutions for all pool shapes and styles

No matter what kind of pool you have rectangular, rim flow, or a free-form shape, we offer installation options that work beautifully with your space.

Here's a look at our remaining configurations for the PoolLock Hydraulic Vinyl Cover.

Top Track – Top Mechanism

Ideal for existing pools with minimal disruption

Looking for a low-hassle option? This setup is perfect if you already have a pool and want to avoid major construction. The track is installed directly on top of your paving or coping, and the mechanism sits at pool level. To finish it off, we can even cover the mechanism with a stylish bench—perfect for relaxing poolside.

Why you'll love it:

- ✓ Quick and simple installation
- ✓ Easy to maintain
- ✓ Great for retrofitting existing pools

Rim Flow Pools

Seamless style for new builds

If you're building a new rim flow pool, this installation is a dream. The system is integrated during construction, with one track mounted to the outer edge of the rim flow, keeping everything sleek and unobtrusive.

Why you'll love it:

- ✓ No visual clutter—everything's tucked away
- ✓ Keeps the elegant look of your rim flow pool
- ✓ Designed with aesthetics in mind

Free Form Pools

Versatile cover option for uniquely shaped pools

Have a pool with curves or a more organic shape? No problem! Our system works wonderfully with free-form pools, whether newly built or already in place. As long as there's a flat surface around the pool, we can install the track system parallel on top of the paving or coping. The mechanism can also be covered with a bench for added charm and convenience.

Why you'll love it:

- ✓ Works with curved or custom pool shapes
- ✓ Quick installation with minimal preparation
- ✓ A neat, practical solution that doesn't compromise on looks

PoolLock Hydraulic System

Strong. Safe. Built to Last.

The PoolLock Hydraulic System is designed to keep your pool safe and your mind at ease. With smart engineering and a discreet, user-friendly design, it offers one of the most secure and long-lasting pool cover solutions available.

What Makes It So Reliable?

The Power Pack (our electrical motor) is safely tucked away next to the pool pump, not within a meter of the water, keeping your pool area safer from electrical risks

The hydraulic drive system is not affected by water, so it stays strong, low maintenance, and built to go the distance—lasting as long as your pool, in most cases!

Tough Vinyl That Looks Good Too

Our hydraulic vinyl covers are made with high-performance vinyl resin and reinforced polyester mesh, giving you excellent tear resistance and long-term durability—even in tough pool environments. And the best part? They're available in a range of stylish colours, so you don't have to sacrifice looks for performance.

With the PoolLock Hydraulic System, you get powerful protection, seamless operation, and peace of mind—wrapped in a sleek, durable design.

PoolLock V5M Easy Glide

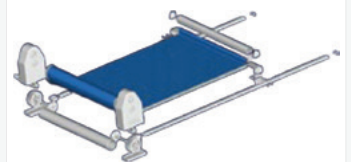

Effortless Safety. Ready for the Future

Looking for a safe, manual pool cover that's easy to use and future-ready? The PoolLock V5M Easy Glide is a step above any other manual system on the market. It's designed for convenience, safety, and smooth everyday operation, no heavy lifting or hassle required.

Why You'll Love It:

- ✓ The built-in gear system (4:1 ratio) makes opening the cover effortless. Simply turn the removable crank handle—it works like a key—and your pool starts to open.
- ✓ Closing the cover is just as simple: pull the easy-to-use harness and you're done.
- ✓ The removable handle adds an extra layer of safety, keeping the system secure when not in use.

A Smart Start to Automation

The V5M is the perfect introduction to automatic pool covers. When you're ready to upgrade, the manual mechanism can easily be replaced with our Hydraulic system and Power Pack—no need to start from scratch.

Flexible Installation Options

The PoolLock V5M Easy Glide works with all the installation styles mentioned earlier, including:

Top Track – Top Mechanism

Under Track – Under Mechanism

Rim Flow

Free Form Pools

Whether you're building a new pool or upgrading an existing one, the V5M Easy Glide is a safe, stylish, and future-forward choice.

Cover Pools Saf-T3 Electric Cover

Trusted Worldwide. Now at Your Poolside.

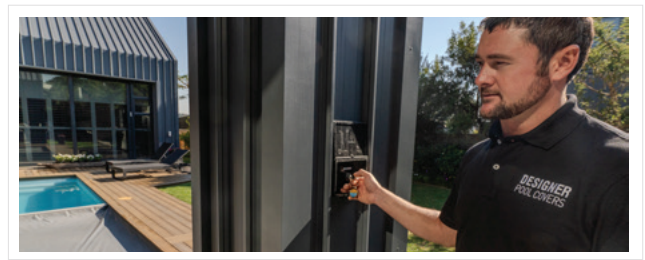

We're proud to be the preferred authorized dealer of Cover Pools Inc., the largest automatic pool cover company in the world. With decades of innovation behind them, their Saf-T3 Electric Cover brings world-class safety and convenience right to your home.

This premium cover offers all the same benefits, safety features, and installation options as our other covers—but with the ease of electric operation.

One Button. Total Control.

Simply press a button, and your pool is covered or uncovered within moments.

It's the perfect blend of convenience, safety, and style, making it an ideal choice for busy families, luxury homeowners, and anyone who loves smart solutions.

Why Choose the Saf-T3 Electric Cover?

Electric motor operation, Simple, effortless control

Same trusted safety and protection features as our hydraulic and manual options

Compatible with multiple installation types

Backed by one of the world's most trusted pool cover brands

Child and Pet Safety Cover

Simple, Safe, and Stress-Free Protection

When it comes to the safety of your little ones and furry family members, peace of mind is everything. Our Child and Pet Safety Cover is designed to offer just that—with no construction required, and a system that's as easy to use as it is secure.

Thoughtful Design. Reliable Performance.

Supported by strong aluminium battens secured into a durable PVC cover, this safety solution overlaps the pool by approximately 300mm on all sides. One end is anchored with removable bolts, while the other is tightened using industrial-strength stainless steel ratchets.

No electrical components or complicated systems

Operated by two people easy to remove, roll up, and store away when not in use

Perfect for families who need a quick, dependable safety option

Built-In Safety Features

Tamper-proof design ensures that once the cover is tensioned, it sits flush and secure, preventing children or pets from slipping underneath

Made from **600–700gsm PVC**, with reinforced aluminium battens

Can **support up to 150kg** across the surface collectively

Integrated drainage holes between each batten prevent rainwater buildup

Whether you have a curious toddler, an adventurous pup, or both, this cover offers a practical layer of protection, giving you confidence every time you step away from the pool.

Thermal Blankets

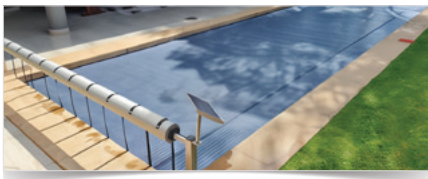

Please note
These are **not** safety covers.

Keep the Warmth In. Keep the Worries Out.

Whether you're looking to heat up your pool, cut back on chemical usage, or simply reduce water evaporation, our Thermal Range has a smart, affordable solution for you.

Each cover floats effortlessly on the surface of your pool, bubble-side down, and can be trimmed to fit any shape or size. It's an easy, low-maintenance way to make your pool more energy-efficient and swim-ready all year round.

Thermal GeoBubble® Cover

A favourite among pool owners, this all-rounder harnesses the sun's natural energy to gradually warm your pool water.

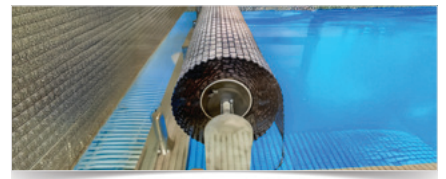

- Dark Blue in Colour
- 400 Microns Thick
- Increases water temp by up to 8°C
- Reduces evaporation
- Retains heat
- Lowers chemical use
- Comes with a 1-Year Warranty

Sol+Guard GeoBubble® Cover

For those wanting maximum heat gain, this cover is our top performer. It lets in more light, making it ideal for sunny areas.

- Light Blue in Colour
- 500 Microns Thick
- Increases water temp by up to 10°C
- Retains heat and reduces evaporation
- Reduces chemical consumption

EnergyGuard Thermal Cover

This cover is all about energy savings and algae prevention. With a dark top and black underside, it blocks sunlight and reduces power usage.

- Grey/Black in Colour (appears midnight blue when raised to the sun)
- 500 Microns Thick
- Increases water temp by up to 7°C
- Prevents algae growth
- Reduces evaporation and retains heat
- Saves on electricity and chemical costs

Optional Extras for Added Convenience

Roll-Up Station

Manual or automated, to make storage a breeze

Protective Cover

Shields your blanket from sun damage when rolled up

Leading Edge

Makes pulling the cover in and out smoother while reducing water splashes on top

Wind Protection Tools

Keep your blanket in place during windy days
